About This Game

Big Action Mega Fight! is a classic single player beat 'em up/brawler with a modern twist! Hilarious 2D cartoon combat will leave you with your jaw on the floor and your hands full of blisters. Blast your way through levels filled with luscious art and unforgettable enemies. How fast can you SMASH?

Megatropolis is overrun with a new vicious criminal gang, the Clunks. You play as Brick Strongarm, a killer-moustache-sporting, iron-pumping gym aficionado with a penchant for lazy Sundays. But when the Clunks kidnap your best friend Hawk, justice calls. Get out there, rescue your friend, and save the city from crime and corruption!

BAMF! is an homage to classic 90s beat 'em ups like **Final Fight**, **Turtles in Time**, **Simpsons Arcade** and **Streets of Rage**, where intense cartoon combat meets tight controls and a satisfying difficulty curve.

So far so good. Like many others, was initially put off, quite a lot, by the sudden change in price / buy model for the game. However as the dev stated he would provide keys to previous owners, I emailed and got a response the same day, with the key for the full version.

The actual game is a lot like Tiny Bang Story which is great. The differences are that there is no jigsaw puzzle between chapters, and instead has a very odd storyline with fully voiced character storytelling in a sort of meta perspective. The regular levels are well done, and you can get hints pretty easily, and can skip a puzzle after about a minute of wait time if it's too difficult or you just don't want to bother.

All in all, it's just about right for what this game should be - colorful, casual, click-and-find goodness.

. buggier than assassins creed unity. delete this ♥♥♥♥♥ing♥♥♥♥♥. It's like Battlefield made with no budget and with discontinued multiplayer! I would only recommend grabbing it when it's on sale, for comedic value.. Unfortunately, I cannot recommend this game. As compared to Capitalism II, the economy here is strange, frustrating, and down right illogical. For example, I am making 100 Quality Flu Vaccine and almost have a complete monopoly on it, however, if I charge more than 2 dollars from the production price, people stop buying. Then suddenly, a competitor releases a 1 Quality Flu Vaccine which is 4 dollars cheaper and he suddenly cornered 1/3 of the market.

One more way this game frustrates me is that it feels like it punishes me for having the highest quality goods. I max out the quality and I am not allowed to have a large profit margin, if I sell at a much higher price than my production costs, no one buys it. That means no matter how much effort I put in to lowering production costs, my selling price will have to lower with it. With over a dozen different products, I can't seem to go over a steady 10,000 dollars a day in profits while maintaining 100 quality goods and a research team that keeps me on top.

While the stock market is simpler and easier to use in this game than Capitalism II, there doesn't seem to be any dividends given out so I don't see point in buying shares of competitors unless I want to outright buy them out. I didn't get a chance to try as it felt futile even after buying 20 percent of a competitor.

Resource production does not have too much of a benefit. The only one I saw was the assurance that you don't run out from the global market. But, as stated above, having cheap raw materials cuts down on production and you are forced to lower your selling price because if your profit margin is large, people stop buying.

Finally, after 15 in game years, the demand for products we the same, no increase or decrease.

There are many things in this game that are great improvements over Capitalism II but no, sorry. I still prefer Capitalism II. If you have not played that game, you will probably be less disappointed with this game.. DLC No Pet :(Wow, I'm sorry, but did I play the same game that others did? I played this on the HTC Vive, and the Oculus Rift, did not bother with WMR because if it was broken on the Vive as it's core supported platform.... I use the word broken because I am not entirely sure if it's actually broken, or simply very bad execution. I know, it's only just over a buck, but putting something out there with this poor of an experience is just bad form in my opinion. Angry Birds was just a buck at one point too.. Given that it is not marked Early Access or school project and thus supposed to be a finished product it is, in my opinion, a travesty to be taking anyone's money.

I will respect the thumbs up here, but wow, don't say I didn't tell you, I feel like my buck is still worth something that's not an obvious asset flip and minimal effort... :(Great Game Loads of fun.

For the short time it held my interest it was amazing. Looks great, smooth controls and the flight was fun and gave me the stubbling in VR feeling because i was so into it.

But the lack of content presently didnt keep me interested for long. Ill reccomend it, in the hope it will have missions/stories and a reason to use those laser guns soon.. It's ok for the price though there are better fireworks simulator software out there. This simulator Is very basic not much in the terms of variety. The best feature is the actual graffics of the morters product placements. As far as the fireworks go there are really set in stone and you can only can configure the fireworks to a certain degree so it is definately very limited. You can't import any 3d models so your stuck with the only two sites they include in the program. In a fireworks show you need tons of product meaning fireworks and this game unfortunately does not have that. I did give it a thumbs up because of the price and some of the graffics.. i love this game

. Darkness Assault is a short survival game where you go around an underground and search for stuff. You have no map so it's really hard to navigate. The shooting is a bit inconsistent, the camera angle is annoying. The story is meh.. If you excuse the technical issues this game suffers from and try to play.... there is still nothing but bad bad bad.

I believe this game was released in 1997 and if it wasnt it sure looks, plays and feels like it is.

AVOID THIS TITLE

. Solid arcade racer, Don't expect this to be a serious simulation but more of a casual racing game to spend your time when you just want to relax. Highly reccomend if you enjoyed Dirt 3.. This game is broken 0/10. Cool game! Not incredibly complex or tricky, but some of the puzzles require more time than you'd think. The combined use of locks, keys, and transmitters made for a few really interesting levels. The last set of puzzles missed the mark by requiring very little thought, but it was enjoyable overall. It is a rather short game, so don't expect a whole lot out of it. My advice is to enjoy the game for what it is! 3/5
